EXECUTIVE SUMMARY

- Versatile technical writing professional with 8.6 years of experience spanning product documentation, technical communications, UI writing, project coordination, training development, and stakeholder management across SaaS, enterprise software, and hardware projects.
- Proven track record in authoring and maintaining diverse documentation sets including online help, user guides, admin guides, product guides, API guides, installation guides, configuration guides, troubleshooting guides, release notes, KBAs, and in-product UI text for both technical and non-technical audiences across global markets.
- Experienced in multi-role contributions as Technical Writer, UX Writer, Documentation Lead, and Subject Matter Collaborator, ensuring accurate, release-ready documentation across every stage of the product lifecycle.
- Demonstrated ability to lead and coordinate documentation projects across multiple business units, managing concurrent deliverables, resource planning, and milestone tracking while maintaining quality and meeting release deadlines.
- Skilled at evaluating and implementing AI-powered documentation tools including smart search, article analytics, procedural video generators, and infographic creation to modernize content workflows and improve self-service outcomes for end users.
- Strong cross-functional collaborator with engineering, QA, product management, UX, support, and training teams, turning complex technical inputs into structured, compliant, and user-focused documentation.

CAREER CONTOUR

Forcepoint Software India Pvt Ltd, *Technical Writer - III*
08/2023 – 01/2026 | Bangalore

- Owned end-to-end documentation for Cloud (SaaS) and on-premises cybersecurity software products, including online help, product guide, quick start guide, API guide, legal notice, and installation guide delivering DITA XML structured, style-compliant content for global audiences.
- Authored release notes, KBAs, FAQs, technical alerts, and newsletters for every product release, ensuring consistent and timely communication for both internal teams and external users.
- Validated documentation accuracy through hands-on product testing, lab environment, and customer ticket analysis, ensuring technical accuracy, UI consistency, and metadata compliance across all deliverables.
- Translated complex technical workflows into clear, concise user-centered documentation enriched with screenshots, flowcharts, diagrams, and videos, improving comprehension for diverse global audiences.
- Collaborated with Engineering, QA, PM, Support, and Training teams across regions and time zones to gather source material, validate accuracy, and deliver release-ready documentation aligned with product timelines.
- Integrated Jira sprint and scrum planning into the DDLC to synchronize documentation deliverables with SDLC milestones, ensuring consistent on-time delivery across all product releases.
- Led Early Access and Pilot Program, collaborating with cross-functional stakeholders to validate product features and confirm technical content readiness before GA launch.
- Piloted and deployed AI-powered tools for procedural video and infographic generation, then authored step-by-step workflow guides and training tutorials to accelerate adoption across internal teams.

INSPIRE AWARD 2010-2011, *Dept. of Science and Technology, Govt of India | 2011*

ACADEMIC ACCOLADES

Academic Achievements

- Rated as School Topper in SSLC for academic year 2010-2011 at Government High School Vazhukkupparai, Coimbatore.
- Gained proficiency in the academic year of 2013-2014 and 2016-2017 at Karpagam University, Coimbatore.
- Achieved Cadet Under Officer Rank in Karpagam University NCC Troop of 2TNCTCNCC of Army Wing batch 2013-2017.

INTERPERSONAL SKILLS

Soft Skills

- Quick learner and self-starter, adept at taking initiative.
- Proficient in technical, computer, and communication skills.
- Demonstrates strong leadership and management abilities.
- Creative and strategic thinker, skilled in problem-solving with strong decision-making abilities.
- Results-oriented and highly motivated, inspiring and driving the team towards success.
- Exceptional planning and organizing skills, ensuring efficient execution of tasks and projects.

- Supported the rollout of AI-powered smart search, article-level analytics, and user feedback collection in the documentation portal, enabling data-driven content improvement architecture and stronger self-service outcomes for end users.
- Supported documentation portal development by conducting UI testing, hyperlink integrity checks, and UX behavior reviews, improving navigation, accessibility, and overall usability for end users.
- Migrated legacy documentation to modern templates, standardizing content structure, repairing broken links, and refreshing branding while maintaining full technical accuracy.
- Monitored industry trends, AI documentation tools, and best practices, translating findings into actionable process and content improvements that kept documentation strategy current and competitive.

Sonovision Aetos Technical Services, *Senior Technical Writer*
10/2019 – 05/2023 | Bangalore

- Authored, reviewed, and published end-to-end product documentation, including user guides, PRDs, troubleshooting guides, FAQs, release notes, and alerts for ERP software and hardware products, meeting industry standards for diverse audiences.
- Authored in-product UI text, such as labels, tooltips, popovers, walkthroughs, and inline help, aligned with UX patterns and terminology standards, providing clear contextual guidance at every user touchpoint.
- Simplified complex technical information using screenshots and flowcharts, conducted peer reviews and editorial checks, and analyzed user and stakeholder feedback to resolve content gaps, maintain style compliance, and continuously improve documentation quality.
- Resolved customer and operator queries with precise technical clarifications, updated documentation on recurring issues, and fed insights back into content improvement cycles to enhance the end-user experience.
- Collaborated with engineers, SMEs, QA, Dev, product managers, support leads, and training teams to capture tribal knowledge, validate procedures, and deliver accurate software and hardware documentation by managing multiple concurrent projects across regions and time zones without missing release deadlines.
- Led and coordinated documentation projects across multiple business units, tracking milestones, managing resource planning, identifying scope gaps, and keeping all deliverables aligned with Agile release plans and organizational priorities.
- Designed and delivered training content and onboarding curricula for new hires, strengthening team adherence to documentation standards and improving ramp-up time for junior writers.
- Researched, adopted, and integrated AI-driven documentation tools to streamline workflows, reduce production time, and improve self-service efficiency for end users.
- Built and maintained a structured documentation repository and knowledge base for learning, content traceability and quick access for all the stakeholders.

Capgemini Technology Services, *Technical Writer*
05/2017 – 10/2019 | Bangalore

- Authored comprehensive hardware documentation, including installation guides, maintenance procedures, test procedures, troubleshooting guides, and system descriptions for technical and non-technical audiences.
- Developed ERP software documentation including user manuals, release notes, and FAQs, ensuring content clarity and alignment with product functionality.
- Translated complex hardware and software concepts into plain content supported by visuals, making technical documentation accessible to a wide range of users.
- Collaborated with SMEs, engineers, product teams, and vendors to gather technical data and maintain content consistency across all deliverables.
- Conducted structured peer reviews and editorial checks to uphold formatting standards, factual accuracy, and full compliance with organizational style guides.
- Built and maintained Excel macros to automate repetitive tasks and streamline server data extraction, reducing manual effort and improving team productivity.
- Designed and delivered internal training programs and documentation for team members, reinforcing documentation standards, process adherence, and supporting product adoption across the organization.
